

## Boy Scouts of Pass Towns Will Camp for 10 Days at Lee Lake

Will March in From Burnis on  
Monday, July 20 at 9.30 a.m.  
Camp Lasts for Ten Days

A meeting of the general committee of the Boy Scouts Association in the Pass towns was held in the office of J. E. Gillis, Blairmore, on Monday evening.

President Westrup of Hillcrest and Treasurer Gillis reported having made arrangements for camp equipment from military stores in Calgary, and George Maffin reported on negotiations for supplies and provisions.

The Scouts from Michel, Coleman, Blairmore, Hillcrest and Bellevue will assemble at Burnis station on Monday, July 20, and march off for camp at 9.30 a.m. There, after a meal prepared by the advance party, they will pitch tents and help in laying out the camp. Scoutmaster Rev. Mr. McMorine of Michel will be camp commandant.

Camp orders will be posted daily, the Scouts being assigned in turn each day to various duties.

On Sunday, July 26, a drumhead divine service will be held in the afternoon, to which all clergy of the Pass towns and parents and visitors are invited. It is also expected that the executive officers of Boy Scout associations in the Pass towns will attend. Provincial Scout Commissioner Backman will spend a day or two in camp, which will be held from July 20 to 30. It is the first time a camp has been held for the combined troops of the Crow's Nest Pass, and the executive committee anticipate that it will prove a very useful and enjoyable camp for the boys. Visitors to the camp should call in the afternoons.

Each boy is asked to contribute \$2.00 towards camp expenses, and the balance of the camp expenses will be met by the respective Scout association funds. Coleman boys intending to go who have not already notified Scoutmaster Turner or Mr. Partington should do so at once. A field day of sports will be held on Wednesday, July 29th.

### Congratulatory Message From King and Queen

The grandparents of James Park, of Coleman Cash Grocery (Mr. and Mrs. Robert Park) whose home is Abbey Cottage, Dyce, Aberdeen, Scotland, were the recipients of the following telegram from the King and Queen on the occasion of their diamond wedding celebration:

"The King and Queen are much interested to hear that yesterday you celebrated your diamond wedding, and I am desired to convey to you their Majesties' sincere congratulations and best wishes for many more happy anniversaries."

—Private Secretary.

Of their family of thirteen—nine sons and four daughters—eleven are alive; and there are 66 grandchildren and 27 great grandchildren. They were married on June 24th, 1871.

### J. E. Gillis the Lucky Man

Many from Coleman attended the Elks carnival at Blairmore last week-end, and though there was not as much money spent as in former years, yet the results were gratifying to the executive committee. The grand prize of a Chevrolet car was won by J. E. Gillis, barrister, of Blairmore, and the ticket was sold to him by his own little son.

## Pleasant Week-End Camp

A camping party spent the week-end at North Fork in the vicinity of the forest ranger's station. In the party were Maurice W. Cooke, C. J. Devine, F. G. Creighton, R. F. Barnes and H. T. Halliwell. They left on Friday afternoon, reaching the camping spot by easy stages. The first thrill was getting one of the cars across the river. It went in under its own power, but was pulled out by man power. As supper was being prepared, a lovely July rain descended, driving the party inside the tent to eat. This, however, was a mere trifle. Saturday morning saw the party up shortly after daybreak, and a heavy frost helped to sharpen the appetite.

Wading the river in the cold early dawn, the car taken across the night before was utilized to proceed a few miles upstream, where an attempt was unsuccessfully made to cross another fording place. Everybody felt very chilled after an hour's struggle to extricate the car. This satisfied the party that fords are not to be taken lightly, and that even a shallow ford has many rocks to cause trouble.

A day's fishing on the Living stone river netted five men just four fishes. Next day those who fished (Cooke and Creighton) were more fortunate, and they had a fair day's catch. It was a very pleasant outing, and quite a number of friends and acquaintances were met around the camp fire.

Fish stories of the week that are true. Editor Bartlett hooking a luck; Col. Bob Barnes catching a dog with his fishing line; "Cubby" Devine swearing to beat the band when fellows with bamboo poles and floats as big as spinning tops frightened the fish for miles up and down the stream; H. T. Halliwell dropping off to sleep beside a shady pool waiting for the fish to bite; five men trying to figure how they could make a supper on four small fishes and a good Samaritan coming to the rescue. There may be many others which have not come to light.

## Orangemen Observe July 12th Anniversary

On Sunday the annual church parade of the local Loyal Orange Lodge was held and the members marched to divine service at St. Alban's church, where the Rev. A. S. Partington, B.A., preached the sermon. About 65 members were present, including several from Blairmore and Pincher Creek. Adam Wilson is worshipful master of the lodge this year, and J. Wilson is recording secretary.

On Monday the annual picnic was held, members and their wives and families gathering in the park just beyond the baseball field, where a very pleasant afternoon was spent under ideal weather conditions.

### Returning to China

Long Ken, of Coleman Cafe, left on Tuesday morning to visit his old home and wife and child in Canton, China, and requested The Journal to wish his friends goodbye. He visited as many as possible on Monday and Tuesday before leaving on the train for Vancouver, but there were many he was unable to see. He expects to be away about a year. By his kindly, genial nature, he made many friends during his seven years here. It is 13 years since he saw his family. "Wish everybody good bye," he said, on leaving.

Long Lok, one of the cooks at Coleman Cafe, also left for China.

## RESTAURANTS ON WHEELS

Strange as it may seem, good housekeeping is one of the prime essentials of modern rail-roading. Mr. Traveller has become so used to strolling through the train to the dining car, for his meals in the way of food for himself, as well as for Mrs. Traveller and all the little travellers, that he hardly gives a thought to how he gets a first class hotel meal, while the answer lies with about 1,200 highly trained employees of the Canadian Pacific Railway serving in some 150 dining and cafe cars, from Atlantic to Pacific, and with an organization in stores and farms throughout the country, which places high class foodstuffs in the chefs' cupboards and refrigerators. The average number of meals served in a year is approximately 2,000,000. As to quantities, suffice to say that these include nearly 500,000 lbs. of tea and coffee and some 400,000 quarts of milk and cream. The pictures show meals being served in a typical C.P.R. diner and types of the staff of chefs and waiters employed in the service.

### A New Record

David Flynn and his friend C. Jaffray of Victoria, set a record for fast travel by auto. They left Victoria at 4.30 p.m. Saturday, making the four-hour trip to Seattle by passenger boat, shipping their car on the same boat, and immediately set out for Coleman, reaching here by 8.30 Pacific time on Sunday evening. It was a non-stop journey except for meals, and they took turns at driving. Dave is spending his holidays visiting his parents, Mr. and Mrs. Thos. Flynn. He is working for the B.C. telephones.

### Local News

Mrs. Ed. Brown of Fernie was visiting friends in town during the week.

Mr. and Mrs. P. F. Craib and children, of Loughhead, Alta., are visiting with Mr. and Mrs. W. L. Rippon.

McKeen Hunter spent a week visiting with Forest Ranger and Mrs. Antle at North Fork ranger station.

Mr. and Mrs. O. E. S. Whiteside and daughter Adele, accompanied by the Misses Monica and Rita Caulfield of Fernie, spent the week-end at Waterton Lakes park.

Last week Mr. and Mrs. Plante and family visited at Glenora over the week-end. Whilst there a brother of Mr. Plante, who farms a few miles from the town, suffered a heavy loss by fire completely destroying his house and other property.

The friends of T. M. Parry, B.Sc., will be pleased to learn that he has been appointed instructor in the Calgary high and technical school, duties to commence in September. He is now in the training school at Hamilton, Ont.

A party of the Girls Guild of St. Alban's are spending a week at Waterton Lakes Park, including Myfany and Thelma Griffiths, Isabel Atkinson, Violet Wilson, Nora Leod, Helen Hancock, Violet Richards, and Leslie Griffiths is the handy man of the party, with Mrs. Griffiths as chaperone.

### Coleman Homing Society

The week-end flight of pigeons was from Sheridan, Wyoming, a distance of 495 miles. 18 birds were sent there, and they were released at 5.25 a.m. Saturday, the weather being clear and no wind at time of release.

Makin's bird was first, arriving on Sunday morning, velocity 857.33 yards per minute; Roughhead second, 516.47 yards per minute. Only six birds had arrived of the 15 up till Wednesday. The first prize was a \$10 pair of shoes donated by Wm. Bell, and a special prize donated by Mr. Whiteside was awarded as second.

The winning bird of this long flight is from the stock of J. Anderson, of Coleman, which was brought from Scotland.

### ST. ALBAN'S CHURCH

Sunday, July 19, 7th after Trinity, service will be at 7 p.m., evening song and sermon.

The Church Army Crusaders, headed by Capt. Casey, will be in the parish from July 27 to Aug. 2. Daily mission services will be held at 8 p.m. and house visitations from 2.30 to 5 p.m.

### Local News

Mrs. J. Emerson and Patricia left on Tuesday morning to spend a holiday in Victoria.

A man named Russell of West Coleman was sent up for 30 days without the option of a fine for assault.

Nora and Lorraine Easton came from Granum on Saturday to visit their grandparents, Mr. and Mrs. J. Lonsbury.

Miss Gladys McKay, a former public school teacher here, and later with Dominion Chautauquas, has been appointed to a post in the Trades & Commerce department, Ottawa, and has left for Ottawa.

Cranbrook was very disappointed on the visit of the fleet of airplanes. In the contract for the air circus ten planes were guaranteed. Only four arrived, the parachute jumper did not reach Cranbrook, and hounds were disappointed.

The League of Nations Society in Canada has sent out petition forms for signature by those who would support world disarmament by international agreement. Copies have been sent to the clergy and The Journal office. If anybody is sufficiently interested to sign, they may do so.

John Clark and Mrs. M. Paterson of Ponoka are visiting the former's brother, Bud, being on a trip via the Windermere trail to Banff. While here they went out in a party to North Fork. Mr. and Mrs. D. Gillespie, Peggy, and Buck Eyesacker went with the party.

## Rod & Gun Club Competition Results

Some Good Catches in North Fork  
River and Competition  
Was Very Close

Eight cars with about 45 members went out on Sunday, leaving here at 6 a.m., for the Waldron ranch, and fine weather made it a very enjoyable day. Prizes were awarded as follows:

O. Smith, first prize for biggest basket of speckled trout, consisting of 15 lbs. 6 ozs.

M. Wilson and Robert Jenkins tied for second prize, Jenkins having 12 fish and Wilson 11, weight of each was 4 lbs.

E. Gudmundsen won the prize for biggest speckled trout with 12 lbs.

T. Rose caught the biggest bull trout of the day, weight 1 lb. 13 ozs.

D. Robert was awarded the prize for the biggest grayling, weight 14 ozs.

The fee for taking part in the competitions will be raised to 75c or \$1.00, in order to cover the expenses of transportation, and the entry fee of those taking cars to convey club members will be borne by the club. The present fee of 50c for each competition does not meet the transportation expenses.

Mr. and Mrs. A. E. Guesard were visitors to Calgary over the week-end, attending the stampede on Saturday. Mr. W. H. Elliott of Fort Frances accompanied them, and he returned east from Calgary.

Mr. and Mrs. A. Oliva left yesterday for Calgary, where it is expected they will reside. For 24 years they have lived in Coleman and Blairmore, and for the past number of years Mr. Oliva has been office manager for Coleman Trading Co. They have quite a lot of real estate property in Blairmore and Coleman. Their friends will wish them success in their new venture.

### Lessons Of The Depression

During periods of depression such as the world is at present experiencing the almost universal tendency is to look upon the gloomy side of things to the exclusion of everything that is hopeful and encouraging. As a result there has been a plethora of dire forebodings, headshakings, and pessimistic utterances, accompanied by an air of scarcity of optimism and hopefulness. People generally can see, and seeing things continually dwell upon the darkness, the losses, everything that is bad in the present situation, but it is rare indeed, to discover any one who finds something good, or prophetic of future good, arising out of existing conditions.

Yet nothing is wholly bad and there may, and often does, develop out of the most adverse circumstances some of the best and finest things of life.

We have observed, for example, a larger sympathy on the part of the average person for their less fortunate fellow-citizens than has been noticeable for a long time. Fewer people are inclined to turn a deaf ear to stories of distress or to appeals for help. The man out of work is not, as a rule, ruthlessly turned away but is received kindly and sympathetically even though it may not be possible to do much or anything for him. Thousands who have little to spare are nevertheless dividing that little with those who have nothing. There is, we believe, less hardness and more sympathy in our relations one with another as a result of an appreciation of existing conditions and problems. The development of such a feeling is so much gain.

It is also true, or at least we are inclined so to believe, that many people are beginning to realize the true inwardness of life—that work, about which in times past they have been inclined to grumble and regard with distaste and as something they would like to avoid, is, after all, one of the greatest blessings conferred upon man by the all-wise Creator of the universe. Today, employment, the opportunity to work, is regarded by nearly everybody as one of the greatest boons they can obtain. Idleness is not a luxury, is not to be desired, it is a heartbreak, a calamity. The compelling necessity to work has been found to be not a hard taskmaster, but a kindly benefactor. The hardest work of all is not to be able to work.

Another much needed lesson which some of us are learning is how puny mere man is after all. In days of prosperity and mighty mechanical achievement and progress, there was a growing inclination to regard ourselves as self-sufficient, as supermen, boastful and vain. And this individualistic self-sufficiency was reflected in national self-sufficiency. We could live upon ourselves alone, at least so we thought, our own lives, and disregard the rest of the world. But we have discovered we are not supermen, nor gods. The rains cease to fall, blighting winds blow and intense heat prevails, and mere man finds himself helpless. He can do nothing. His accumulated savings are eaten up. He is in distress, and his condition of distress reacts upon other people and nations thousands of miles away, just as their difficulties and losses react upon him. One suffers; all suffer. Mankind is a brotherhood, and there is one ruling Power over all. These are truths which cannot be denied or ignored.

### Prodigy Finishes Up At Adding Machine

Brooklyn Boy Shames At Unusually Brilliant Start

This is the time of year when the college graduate goes forth to conquer the world. And yet—William J. Sidis at the age of six months knew the alphabet. When he was but two years old he could read and write with ease, spell correctly and carry on an intelligent conversation. By the time he was four he had mastered four languages. At six years of age he completed an entire eight-year grammar school course in six months, and two years later he was graduated from the Brooklyn High School after completing the four-year course in half a year. Entering Harvard University at the age of 11, he was graduated with honors four years later. Sidis then took post-graduate work and became a teacher of mathematics. This boy wonder—says John Hix, in his *Strange As It Seems*: Illustrations—was discovered five years later running an adding machine in a New York store.

### Reduction In Colds

A ten per cent. reduction in frequency of colds among a group of 14 Cornell women students is the latest record of using scientific knowledge. Seventy-five Cornell men taking the same treatment showed a reduction of 42 per cent. The cold protection is ultra-violet light, alkali, diet, ventilation and sleep.

### Could Not Check The Summer Complaint

### A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes: "Last summer my youngest son was very bad with summer complaint, and everything he ate was spoiled and he got so that I became very worried. I could not get the discharge checked, so I went to the drugstore and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharge were being checked, and he was not long before he was well again."

### Drought Decimates Ducks

Dry Year Takes Heavy Toll Of Young Broods

The death rate among young wild ducks in Saskatchewan this year, owing to the drought, has been extremely heavy, was the opinion expressed recently at a special meeting called by members of the Saskatchewan Fish and Game Protective Association. Arthur Elter, game warden of Saskatchewan, and Dr. W. B. Bell, of the Bureau of Biological Survey, Washington, D.C.

The extreme seriousness of the situation could not be stressed too much, was the unanimous opinion, and the sportsmen want the shooting season greatly curtailed if the United States will do likewise.

Dr. Bell said he had come to Saskatchewan because of the alarming reports received by his department. The department had not been sure that the reports had not been exaggerated and had decided to investigate for itself. "And I can assure you," declared Dr. Bell, "the reports have not been exaggerated. Mr. Elter and I have just finished a 500-mile trip and have counted exactly 400 ducks and of this number only 24 were young ones. On one lake we counted 320 ducks and there were no young ones amongst them. We believe that the adult ducks had gathered after their broods on a number of small sloughs had died owing to the drought."

Mr. Elter stressed that the trip had been a very thorough one from the duck investigation standpoint. At every point touched very full inquiries had been made among sportsmen and farmers and they had declared that the death rate had been extremely heavy. It was doubtful if one per cent. of the young duck population in a great portion of the province had survived the drought.

### Canadian Mines Pay Dividends

Several British Columbia Companies Distribute Substantial Sums

All mines are not just holes in the ground into which suckers drop their money. Despite talk of hard times and low-priced metal markets, Canadian mines are still paying steady dividends.

Several British Columbia companies are to pay out their usual quarterly dividends. Some of them amount to quite substantial sums.

Pioneer Gold will pay out over \$52,000.

Premier Gold will pay out \$150,000. Howe Sound (which operates the Sullivan Mine) will pay out \$240,000.

Consolidated Mining and Smelting (which operates the Sullivan Mine and the Trail Smelter) will pay out \$630,000.

Sir Donald Mann tells us of declining to buy the Sullivan when it was offered to him by the original headed Sullivan for \$12,000. Since then it has had spells of good luck when lead and zinc were high, when it made \$60,000 a day.

The day may not be very far distant when the great pre-Cambrian shield which blankets northern Saskatchewan, will be supporting big mines and paying out millions in quarterly dividends.—Regina Daily Star.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unfit for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

### Bible Weighs Half A Ton

Los Angeles's Carpenter Has Completed Largest Copy In World

For two years Louis Wayne, a Los Angeles carpenter, has been working day and night to make the largest Bible in the world. Now he has completed his task. Using a hand-stamping machine, Wayne stamped on to the 3ft. pages of his giant book every single letter, symbol, and punctuation mark, taking his family Bible as a pattern. The book contains 8,064 pages and weighs 1,064 pounds, and it spreads to a width of eight feet and two inches.

### Made Poor Guess

"The place will never amount to a hill of beans." This was the prediction of Sergeant Joseph Herbert 65 years ago to Winnipeg's future. He gave away the land the Crown granted him, and marched east with the Royal Canadian Rifles when that regiment was recalled to Halifax. Recently a son of the sergeant of Red River days visited the city. The pages of land his father gave away is now the site of the City Hall.

Fuel alcohol is made from pine-apple waste in a plant near Honolulu, H.I.

### Weekly Newspaper Association

S. J. Dornan, of Alameda, Is Elected President for Coming Year

S. J. Dornan, Alameda, Sask., becomes the president of the Canadian Weekly Newspapers' association for the ensuing year, as the result of the election of officers, held in the Hotel Macdonald, Regina, at the recent convention. As a consequence, Malcolm MacBeth, retiring president, becomes past president; A. W. Marsh, Amherstburg, Ont., first vice-president, and E. Roy Sales is re-elected to the position of managing-director.

Directors elected were: Maritimes—H. S. Anslow, Windsor; H. B. Anslow, Campbellton; Don Fraser, New Glasgow; Quebec—C. E. Labrecque, Three Rivers; Adair Sellar, Huntingdon; P. E. Rioux, Drummondville; Ontario—J. A. MacLaren, Barrie; Lorne Eddy, St. Mary's; D. Williams, Collingwood; G. Lake, Timmins; Col. A. Macdonald, Alexandria; C. Chantren, Brampton; Elgin Harris, Burlington; R. Lancaster, M.L.A., Havelock; Manitoba—J. Cowie, Carberry; L. J. Bennett, Carman, Saskatchewan—Cameron McIntosh, M.P., North Battleford; S. N. Wynn, Yorkton; Donald Dunbar, Alberta—S. R. Moore, Swift Current; Alberta—Fred Turnbull, Red Deer; Herb McCree, Hanna, British Columbia—C. A. Barber, Chilliwack; Ralph White, Kamloops.

Concluding exercises of the convention were marked by resolutions of thanks to the city, the railway companies and the public citizens that contributed towards "one of the finest conventions in the history of the association."

### Recipes For This Week

(By Betty Barclay)

### SPANISH SALAD

(Serves 6.)

- 2 large tomatoes.
  - 2 green peppers.
  - 2 oranges.
  - 1 tablespoon minced onion.
- Cut each tomato into 3 slices. Take seeds from green peppers and cut each into 3 rings. Peel oranges and cut in small pieces. On each salad plate arrange tomato slice topped with pepper ring. Fill center of ring with dressing. Pour over salad.

### MEAT PIES WITH RICE

Four cups cooked rice, 1 onion, 2 cups tomatoes, 1/2 teaspoon salt, 1/2 teaspoon pepper, 1 tablespoon fat, 1 pound raw meat or left-over meat set up small. Melt the fat, add the sliced onion, and if raw meat is used, add and stir until the red color disappears. Add the tomato and seasoning after the onion is browned, and heat through. Grease a baking dish, put in a layer of rice, add the meat and gravy and cover with the rice dotted with fat. Bake for half an hour.

Miller's Worm Powders are sweet and palatable to children, who show little interest in worm medicine. They will certainly bring worm trouble to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Believes Amundsen Is Alive  
General Umberto Nobile, Italian explorer, who commanded the dirigible, "Maligni," when she sailed for Archangel, July 15, for an expedition into the far north. He hopes that he may find Roald Amundsen, and the men of the Italia expedition.

An Accomplished Linguist  
Lieut.-Gen. Sir W. Edmund Ironside, who has just been appointed lieutenant of the Tower of London, can speak at least a dozen Oriental languages. He is six feet four inches tall, and was commander-in-chief of the Allied Forces in Archangel, Russia, in 1918-1919.

### Fastest Atlantic Crossing

Empress of Britain Sets New Record In Mercantile Marine of Any Country

Making the fastest trans-Atlantic crossing ever recorded by the mercantile marine of any country, the new 42,500 ton Canadian Pacific liner Empress of Britain at 3:15 a.m. Monday, June 22nd, recaptured the Blue Riband of the Atlantic for British shipping. Establishing a new world's record of four days, twelve hours and thirty minutes between Cherbourg and Father Point, mails were landed and the pilot taken on, in four hours and twenty-six minutes better time than the previous record of four days, seventeen hours and six minutes made between Cherbourg and Ambrose Light where pilots are taken aboard New York bound ships. The Canadian Pacific now holds the Blue Riband on both the Atlantic and the Pacific oceans, the Empress of Japan holding the record for the run from Vancouver to Yokohama.

### B.C. Timber Resources

Industry Gives Steady Employment To 45,000 Men

Average annual revenue received by the Crown from forest sources in British Columbia during the past ten years, according to an official report, has been in excess of \$3,725,000; the average value of materials produced has been more than \$80,000,000, and during this time the industry has given steady employment to about 45,000 men.

It is estimated that there are at present in British Columbia commercial stands of timber covering about 16,900,000 acres. Of the more important commercial species the amount of timber available for immediate future use is approximately as follows: Douglas Fir, 54,000,000 board feet; Western Hemlock, 61,000,000 board feet; Western Red Cedar, 60,000,000 board feet; Spruce, 70,000,000 board feet.

### Use Empire Timber

London County Council Favors Use Of Home-Grown Article

The use of home-grown or empire timber only in the manufacture of furniture for the London County Council, provided supplies of such timber of suitable quality are obtainable at reasonable prices was recommended by the council's general purposes committee which has been studying the question of policy regarding the use of empire timbers for the council's requirements.

The Canadian Chamber of Commerce in Great Britain has forwarded a resolution appreciating the decision to the council.

Douglas' Egyptian Liniment, always quick, always certain. Stops itching instantly. Catarrhs wounds and prevents blood poisoning. Splendid for muscular rheumatism.

The reason so many people miss the road to happiness is because when they come to it it looks so much like a detour they take the better-looking side.

Science is still trying to find out when and where farming was first attempted in ancient America.

### UNIVERSITY OF MANITOBA

### WINNIPEG

Offers, among others, the following Courses:  
Through its FACULTY OF ARTS AND SCIENCE courses leading to the degree of B.Sc. (Phar.), and M.Sc. including B.Sc. (Phar.), and M.Sc. Through its FACULTY OF ARCHITECTURE and B.A. and B.Sc. (Phar.) Through its FACULTY OF AGRICULTURE and HOME ECONOMICS courses. Through the degree of B.Sc. (Agr.) and B.Sc. (Hort.) Through its FACULTY OF EDUCATION a course through the degree of B.Ed. For terms of admission, details of courses and other information, apply to W. J. SPENCE, Registrar, University of Manitoba, Winnipeg.

### Decrease In Forest Fires

Decided Drop In Prince Albert District This Year

A decided drop in the number of forest fires in the district is very noticeable compared to last year. The number of fires in the Prince Albert district including the Prince Albert area west to the Big River forest reserve and east to Nipawin. Last year at this time there were 60 fires in the Nisbet reserve alone.

A reward is given for the present low average in fires is the rewards offered for information leading to the arrest and conviction of persons willfully starting fires. In addition to this, the campaign against forest fires is bringing good results, also the radio telegraph in operation enables the rangers to keep in touch with each other as to conditions.

The co-operation of the public is asked to enable the forestry officials to retain this high standard throughout the dry season when tourist traffic is general.

Internally and Externally It Is Good—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

### London Still In Lead

Population Exceeds New York By Over Million

London still is the world's largest city by a margin of more than a million inhabitants over New York.

Metropolitan London, containing the "outer ring" which corresponds to that known as Greater New York, has a population of 8,202,818, preliminary summaries of the census taken April 28 indicate. The population of Greater New York in the last United States census was 6,881,917, or 1,220,901 less than its British rival.

Horace Luck, 80, one of the last postmen who blew a bugle when delivering letters in London, England, is dead.

## Grave Political Situation May Result From German Economic Crisis

London, England.—Vitality critical days in world history are being lived in Britain to be immediately ahead.

It was felt particularly in financial circles that even the next 24 or 48 hours might produce developments which would finally decide whether a large section of Europe would plunge into economic chaos with all the attendant political upheavals or whether President Hoover's gesture really would bear its expected fruit.

Although outwardly the British week-end calm brooded over the country, the realization of great events stirring was present in many quarters.

Financiers, commercial directors and many others abandoned their usual Sunday game of golf to keep in touch by telephone with representatives in Paris and Berlin and it is safe to say that the day of rest of a number of government officials was one in name only.

Secrecy with which Montague Norman and other leaders of international finance were conducting their operations had a natural consequence in rumors and stories of all kinds in the press. One important Sunday newspaper devoted its largest headline type to a report that the United States Federal Reserve Bank had expressed willingness to grant the Reichsbank credit of \$200,000,000 to \$300,000,000.

Other Sunday papers concentrated more on the political aspects of the situation with special reference to the precarious situation of the Bruening government.

Outside of news columns, editorial writers and others attempted to give their readers some clue through the maze of past events. Although a great divergence of views naturally were expressed in their columns, there was practical unanimity in declaring the position grave in the extreme and that gravity largely due to delay in Paris while the French and United States representatives were discussing the Hoover proposal.

Zeppelin Service Postponed

Friedrichshafen, Germany, Dr. Hugo Eckener, president of a meeting of stockholders in the German Aeronautic Society, said his plans for regular trans-Atlantic Zeppelin service had been postponed until next year because of the unfavorable economic situation.

## Political Leaders Clash On Old Battleground Of Tariff Principles

Ottawa, Ont.—The amendment of Rt. Hon. Mackenzie King, moved on third reading of the bill to create a tariff board, was defeated in the House of Commons by 34 votes.

The vote stood 101 for the amendment, 51; against, 85.

As soon as the result of the division was declared, Hon. Ernest Lapointe, former minister of justice, moved the six months' hoist to the bill. This motion was declared lost without a registered vote.

The bill then received third reading. Ottawa, Ont.—Liberal and Conservative leaders clashed once more on the old battleground of tariff principles. Asserting that the tariff policy of the government, as exemplified in changes of duty provided for in the budget, would bring about a condition of stagnation in Canada's trade, Rt. Hon. Mackenzie King, opposition leader, criticized the government proposals.

This was not a time for experiments warned the Liberal leader. The trend of the world today was in the direction of lower tariffs; high tariffs had been tried and found wanting, and nations were turning back to moderate duties.

Canada was confronted with an extremely grave situation, retorted Rt. Hon. R. B. Bennett, Prime Minister. Depressed conditions throughout the world were forcing nations to adopt extreme measures. Dumping of goods into an unprotected Canadian market might mean the extinction of industries of Canada engaged in the manufacture of those commodities, this the government proposed to prevent.

The House of Commons was engaged in consideration of the most contentious piece of legislation remaining on the order paper when

## Plan To Organize Labor Battalions

Is Considered Best Way To Help The Unemployed

Ottawa, Ont.—The proposal to deal with unemployment by organizing labor battalions is being much discussed among members of the House of Commons since the suggestion was made some time ago by Gen. A. E. Ross, Conservative member for Kingston. Several similar suggestions have since been made.

It was proposed to have the battalions work on the road construction, tree planting, and other useful undertakings. The suggestion of Gen. Ross was that the battalions would be commanded by officers who were not members of the permanent militia force.

Labor members will likely be ready to support the scheme, but are understood to be strongly opposed to such battalions being under the Department of National Defence. They should be under the Public Works Department or the Labor Department, they contend.

## Conservatives Hold Seat

Win By Election In Ontario Riding By 156 Majority

Simcoe, Ont.—An unofficial summary of results in the Norfolk provincial by-election showed the Conservative candidate A. C. Burt, elected by a majority of 156 votes over a Liberal opponent, with the third candidate, an Independent, losing his deposit.

Unrevised final figures were: Dr. A. C. Burt, Conservative, 5,710; Eric W. Cross, Liberal, 5,554; A. C. Stewart, Independent, 272. Both sides claimed victory before the complete and official figures could be checked.

In the last general elections, Hon. John S. Martin, former member of the Ontario cabinet and a Conservative, had been elected with a majority of 1,403.

## Goos Over To Opposition

London, England.—Oswald Mosley, one time known as the millionaire socialist, has formally joined the opposition to the government, surrendering his seat on the Labor benches for one of the Conservative back benches.

Mr. Bennett and Mr. King spoke.

The customs tariff resolution, implementing approximately 200 changes in duties on imported goods, was under discussion. This resolution, the most important of those brought forward in the budget, contains material for lengthy debate. The lateness of the session, however, may militate against long discussion.

The prime minister gave examples of the dumping practices which the government proposed to prohibit. A foreign manufacturer was attempting to introduce safety pins into the Canadian market. Consequently he sold a pair of 144 graduated safety pins for five cents. By so doing he threatened the life of a Montreal industry, also manufacturing safety pins, and employing 50 Canadians. Should the government stand by and see the Canadian firm destroyed, asked the prime minister.

The House, in committee of ways and means, finally got down to considering the various changes in duty provided for in the budget. The Australian treaty has not yet been brought down, and consequently a number of items affected by that pact are standing over.

The first tariff item taken up provides a duty of 20 cents per bushel under the intermediate tariff on Indian corn, under the general tariff the duty is 25 cents, while it comes in free under the British preference.

Hon. J. L. Ralston (Lib. St. John's-Yarmouth), led a series of protests against this import. In the Maritime Provinces alone, approximately 700,000 bushels of corn were imported each year for use as poultry feed. Col. Ralston was supported by opposition members from British Columbia, who claimed that the poultry raising industry there required corn.

## North Battleford Storm

Hurricane Does Damage Estimated At \$100,000

North Battleford, — Damage estimated at \$100,000 was incurred here Friday, July 10, as, for three-quarters of an hour, the city was rocked by a storm of cyclonic proportions. No lives were lost as the mainstrom swept through the city, but all movable property in the path of the storm was ruthlessly surged aside. The storm commenced at 5 o'clock and lasted until 5:45 p.m.

Roofs were torn off buildings like so much matchwood. Buildings were turned upside down and cars were swept with the storm to the limits of the city.

Greatest individual damage was done to the provincial power plant, the roof of which was torn off and the main steam heater severed in two parts as falling masonry from caving walls descended about the turbine in the engine room.

King Street was completely blocked by fallen roofs, and the Gregory building was denuded as a tremendous gust of wind took its toll. Other buildings to suffer included the Olding Block, Massey-Harris Building, and the Riverview school, which was erected last year.

## Medals For Bravery

Four Young Brazilians Receive Recognition From Royal Canadian Humane Society

Hamilton, Ont. — Bronze medals "for bravery" have been awarded to four young men of Rio De Janeiro, Brazil, by the Royal Canadian Humane Society.

The four, cited for their heroism March 27, 1931, in rescuing three North American visitors from drowning at Copacabana Beach, are Archibald Pinto Amado, Jorge Pinto Amado, Edilton Lima Coelho and Roberto Dolabella.

The rescue occurred at the beach when three members of the Canadian trade mission to Brazil, and a friend from the United States, were swimming there. They were carried out from shore by the heavy surf and the undertow, when the young Brazilians went to their assistance.

One of the men rescued, C. E. Marley, London, Ont., failed to respond to attempts at resuscitation, but the three others, Arthur W. White, London; Thomas H. Ramsey, Edmonton; and W. F. Routh, United States friend of the party, survived.

## Sympathy From Britain

Expression Of Regret On Partial Crop Failure Heard In British House Of Commons

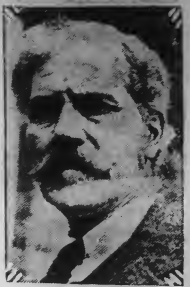

London, England.—"It is an sure the House will greatly regret to hear the present drought is expected to have a very serious effect on crop prospects in the prairie provinces of Canada," said Rt. Hon. J. H. Thomas, secretary for the Dominions, referring in the House of Commons to the causes and probable economic effects of the failure of a large portion of the Canadian wheat crop. "As to the position generally I can only refer to the statement made by the Prime Minister of Canada on July 1." Mr. Thomas continued. This was Mr. Bennett's review in the House of Commons of the serious situation confronting the people of a large section of Saskatchewan and of smaller sections of Alberta and Manitoba when he announced the Dominion government would take measures for relief.

## DADDY DOES THE TRICK

In all the millions that followed the progress of Wiley Post and Harold Gatty, who flew around the world in nine days, none were more intimately interested than the group presented above. Mrs. Harold Gatty, wife of the flier, with her children, Alan, five years old; Lindsay, three, and Ronald, who is nearly two. They were confident "Daddy" would get back home in "Winnie Mae" after the strenuous flight.

## PREMIER McDONALD

Labor Government sustained when recalcitrant leftwingers who moved rejection of unemployment insurance anomalies bill, were defeated by vote of 231 to 19.

## Looking For Advance In Disarmament Plans

Move Is Seen As Consequence Of War Debts Moratorium

Washington. — Definite advance in world disarmament is expected by the administration as one important consequence of the war debts moratorium.

With the holiday in intergovernmental payments definitely assured and steps already taken to adjust remaining details President Hoover and his advisors made the forthcoming general disarmament conference their next diplomatic objective. Three times in as many months the chief executive has linked the increasing costs of armies, navies and fortifications directly with the world's economic burdens.

The disarmament conference will be held at Geneva in February, 1932, under the auspices of the League of Nations. The United States will participate fully and officially.

## Had Easy Victory

Labor Government Triumphs Over Recalcitrant Leftwingers

London, England.—The government had an easy triumph in the House of Commons over recalcitrant leftwingers who moved the rejection of the unemployment insurance anomalies bill, which aims to remove some of the unsatisfactory features existing in unemployment insurance.

The left wing, led by James Maxton, objected that the bill was wholly inadequate, but after some hours debate they failed to convince the House and the rejection motion was defeated 231 to 19.

The minority included the followers of Sir Oswald Mosley, who moved from the Labor side of the House to the opposition side. The Conservatives did not vote and several Laborites and Liberals also abstained.

## Anglo-American Relations

Toronto, Ont.—Delegations of university professors and students from Great Britain and Canada have accepted the invitation of the Carnegie Foundation to discuss Anglo-American relations with a similar group from United States colleges at the University of Michigan from July 12 to 19. Stanley Rands will represent the University of Alberta and James A. Gibson, University of British Columbia.

## Prairie Premiers Will Hold Conference To Discuss Pool Affairs

### Approve Tariff Board

Term Of Office Is Fixed For A Period Of Ten Years

Ottawa, Ont. — After a rough passage and much buffeting, the government bill providing for the appointment of a tariff board finally passed the committee stage in the House of Commons. It now stands for third reading which, in the majority of cases, is merely a formality. It is possible that members of the Liberal opposition will seize the opportunity offered by the motion for third reading to voice briefly once again the many objections which they have developed. Discussion, however, must now be limited.

The bill, in brief, provides for the appointment of a board of three members, of which one is to be chairman, with the powers of a court of record. Its function, as indicated by the prime minister, will be to "find facts" upon which tariff duties may be based. It will endeavor to determine the cost of production of goods in foreign countries, the cost of producing similar commodities in Canada, and the rates of duties necessary to equalize costs. Its findings shall be reported to the Minister of Finance.

Salaries are placed at \$12,000 for the chairman and \$10,000 for each member of the board, and the term of office is fixed at ten years. In addition to its purely tariff activities, the board is empowered to perform certain functions under the Combines Investigation Act. It also assumes the duties now attaching to the board of customs.

## Invitation Extended To Prairie Premiers

To Give Evidence Before Committee On Grain Marketing

Ottawa, Ont.—The House of Commons committee on grain marketing, extending an invitation to the premiers of the three prairie provinces to have one of them appear before the committee to give evidence respecting the marketing of grain.

The suggestion was placed before the committee by Milton N. Campbell (Prog. MacKenzie), who urged that since the prairie provinces had been left "with the elevators on their doorstep" the governments of these provinces were vitally concerned in the conditions of grain marketing and in carrying out the responsibilities which they had now fallen heir to.

The sentiment of the committee was that the provincial prime ministers might select one of their number as spokesmen. "We have not disposed of grain marketing," said E. J. Gariand (U.F.A. Bow River), "until we have heard from them."

Edmonton, Alberta.—Wheat pool re-organization and government guarantees of pool operations will be finally considered, it is expected, at a conference to be held at Regina this week, when the three prairie premiers will be present. The purpose of the meeting will be to decide upon a uniform method of dealing with both questions, to be adopted by the three provinces.

Premier Brownlee has been in communication with both Premier Bracken of Manitoba, and Premier Anderson of Saskatchewan, the latter of whom is still in Ottawa and is representing the three provincial governments at the inquiry of the parliamentary committee on agriculture into the wheat marketing question. There is general agreement between the premiers that an inter-provincial conference should be held as soon as possible to settle upon future organization and guarantee policies, but Premier Anderson will not be able to return for an earlier date than July 16.

It is Premier Brownlee's intention to attend the meeting of the wheat pool delegates in Calgary and then to go on to Regina for the inter-provincial meeting. The general lines of a suggested plan of re-organization will be discussed at the pool meeting in Calgary, including elevator policy and general operations, and its decision will enable the Regina conference to know more exactly what the Alberta reaction to the situation will be.

As to the government guarantees, Mr. Brownlee says that it is felt by the three premiers that uniform steps to safeguard them are desirable, and that to end this phase of the question will be discussed, following up and finally acting upon the preliminary discussions already held.

## Death Of Mrs. McKinney

Was First Woman To Be Elected To Legislative Body In The British Empire

Calgary, Alberta.—The first woman to be elected to a legislative body in the British Empire, for the past decade, Mrs. Louise C. McKinney, died Friday, July 10, at her home in Claresholm, near Calgary.

At the age of 66, she was in the prime of her life. Mrs. McKinney was best known for her endeavors on behalf of the Women's Christian Temperance Union and the Imperial Order, Daughters of the Empire. At her death she was Alberta president and world vice-president of the W.C.T.U.

Mrs. McKinney was successful in the general elections in Alberta in 1917, winning the constituency of Claresholm. She had been active in the community of Claresholm for several years prior to being nominated for provincial honors.

## Opinions Given By Two Elements Concerned With Marketing Of Wheat

Ottawa, Ont.—Opinions of two elements most vitally concerned with the marketing of Canadian wheat were presented to the House of Commons committee of agriculture here, when James Richardson, of Winnipeg, Man., and Andrew Cairns, of Winnipeg, gave evidence on behalf of the grain trade and the wheat pool respectively. The committee has been vested with the task of enquiring into the better marketing of farm produce.

General world conditions were canvassed and a variety of reasons assigned to the present depressed state of wheat markets. The presence of a 200,000,000-bushel carry-over on the North American continent this year was a factor which continued to threaten the situation, Mr. Richardson declared, and to this would be added a surplus estimated for the present year among the wheat-growing countries of another 200,000,000. In spite of this, however, Mr. Richardson was optimistic for the future.

"Our main problems today are economic," Mr. Richardson said, "but the policy of this continent during the last few years has accentuated our difficulties. We cannot escape the penalty of having allowed an undue surplus to accumulate on this continent."

Mr. Richardson was opposed to the establishment of a wheat board, whose powers would embrace the fixing and regulating of prices. He did not think that a bonus of five cents a bushel was a bad thing for the farmers.

Australia's position in the Orient had been secured through the Commonwealth's depreciated currency, he told the committee, and agreed that if Canada depreciated the currency of this Dominion it would enable the farmer to sell more, to get more of that currency for his produce and enable him, at least, to pay his debts.

Mr. Cairns predicted a national catastrophe if there should be any flooding of the market this year with the current year's crop. A break of 10 or 12 cents in the fall would be calamitous. Speculative marketing being dead, someone would have to assume the responsibility of hedging the crop until it could be directed into consumptive channels.

He had found no resentment in Europe against the policy of the Canadian wheat pool, nor did he ascribe the desire of the European countries to be self-supporting to any such resentment. Rather it was a lesson taught them by the war that they should be self-supporting.

Mr. Cairns could not see much hope in the immediate future, although there were remote indications of things becoming brighter.

A couple of Reds from Calgary  
held a meeting in the Italian Hall,  
Ferne Annex, on Sunday evening.  
They are endeavoring to form a  
branch of the Unity League, a com-  
munist organization with head-  
quarters in Moscow. Another  
meeting with a coast agitator spout-  
ing his lungs out was held last  
evening. These birds of prey are  
always very much in evidence in  
hard times, when they do all in  
their power to augment the feeling  
of unrest which prevails at those  
times. The Dominion Government  
is seriously considering a general  
deportation of these paid Moscow  
agents who are growing bolder in  
the larger cities.

## NOTES AND COMMENTS

The great army of tourists is on the move. The high-  
way through the mountains is marked by a cloud of dust  
from sunrise to sunset. Bored looking passengers flash by  
in cars loaded with camping equipment appearing anything  
but pleasant, as if they are anxious to get to the next stop-  
ping place to eat and rest.

They get a good view of the mountains, but do not ex-  
perience the real delights of a vacation in ideal surround-  
ings. Many people's boast is that they have been in this  
or that place, and the more places they can name the more  
superior they imagine themselves to be above the common  
herd. A two weeks real holiday in the mountains, with  
the freedom of camp life and the enjoyment and thrills of  
fishing by those who enjoy such pastime, re-creates energy  
and enables the vacationist to return to work benefited  
from the change. A long trip on dusty roads wears the  
soul and burns up energy.

Many are returning to the railroad for comfortable  
travel. There is usually plenty of space and one may re-  
lax in a railway coach; have a choice meal or a comfortable  
bed if on a long journey. Your knees are not cramped into  
the space between the seat ahead and your own, neither is  
the dust blown into your face every time a car passes. The  
motor coach fills a useful purpose for short distance travel,  
but for a long journey those who desire comfort and en-  
joyment take the train.

Calgary stampede showed 4,000 less attendance this  
year than in 1930. 1930 showed less than 1929, indicating  
that the depression has some effect in curtailing attendance.  
Yet one concludes that statements of hard times are ex-  
aggerated, or people are reckless. Nearly 200,000 people  
paid admission fees to the stampede, ranging from \$1.00 to  
\$2.00; they spent money on travelling, visiting the shows  
on the midway and buying refreshments.

A carnival was held in Blairmore last week, and it too  
was attended by a large throng. Not as much money was  
spent as in former years, but it shows a surplus. Consider-  
ing the large sums spent on pleasure, one concludes that  
hard times, as far as Alberta is concerned, are so greatly  
exaggerated as to make one doubt if they exist. If one  
had to live on bread and water, it would be hard times.  
This province is a very long way from that standard of  
hard times.

The "greenhorn" concludes that angling, or fishing,  
to give it the common term, is a delusion and a snare. The  
man or boy who has the instinct, the "know how" of fish-  
ing, wonders why it is the novice cannot catch fish as much  
as the novice wonders how the other fellow does it. Do you  
have to start young—is there a secret in casting a fly—or  
is there a magnetic or hypno-  
tic power in the eye of the  
successful fisherman? We  
give up trying to solve the  
problem, the same as we have  
given up hopes of ever land-  
ing a real fighting trout, on  
the basis of he that expects  
nothing will receive much.  
We have brought home some  
fish to save our face, but were  
it not for the kindness of sym-  
pathising friends we would  
be held in derision by the en-  
tire household as a fisherman.

This fishing business is a  
splendid revenue producer for  
the province. A few thou-  
sands pay \$2.25 each for a  
license; they burn up thou-  
sands of gallons of gasoline  
travelling to the haunts;  
many visit the government  
vendor for a bottle or two for  
medicinal purposes; these  
items alone netting the gov-  
ernment a profit that would  
make a highway robber blush.

The government in turn is  
very niggardly. It has notices  
posted throughout the forests  
telling people to "Save the  
Forest," and yet cuts down  
on the ranger service till it is  
nothing short of a scandal.  
Crows Nest Forest Reserve

has an area of well over 600  
square miles along the east-  
ern slope of the Rockies, and  
to save the forest nine men  
are employed. With the  
hundreds that pour in during  
the fishing season, and the  
increased risk from fires, how  
can nine men cover such an  
area and see that forestry reg-  
ulations are observed by  
hundreds of careless camp-  
ers? Public agitation should  
impress on the provincial au-  
thorities that increased pro-  
tection should be given our  
greatest asset as a vacation  
ground, not only to tourists,  
but to thousands of people in  
Alberta. Here is a chance  
for George Cruickshank, as  
representing Rocky Mountain  
constituency, to make his  
voice heard in the legislative  
halls. The whole province  
would be behind such an  
effort.

The highways department  
is having removed from high-  
ways bill and sign boards.  
The regulations stipulate that  
these signs shall not be with-  
in 60 feet of the highway, and  
a specified distance from any  
city, town or village. Those  
who have erected boards may  
object, but the law has been  
in force for some time. The  
motoring public will approve,  
for nothing spoils a fine view  
or pleasing landscape so  
much as an ugly signboard  
possessing neither artistic  
beauty or regard for the spot  
in which it is placed. Some  
of the signs noticed would  
frighten people away from  
the places they advertise, for  
they are of the crudest form  
imaginable and painted by  
dubs who know nothing of  
balance in lettering or har-  
mony. The highways are  
well rid of such ugly and re-  
pellant signs.

Fish stories are quite plen-  
tiful at present—more plen-  
tiful with some than the  
fish.

# Fifty Per Cent. Of Cattle Hides In Canada Last Year Were Damaged By Warble Fly Grubs

Fully half of the 1,500,000 cattle hides taken off last year in Canada showed unmistakable evidence of damage by warble fly grubs and the value of the finished leather produced from these hides was reduced by at least \$700,000. The extent of the additional loss in reduced milk and beef production cannot be determined, but it is probably equal to, or greater than, the direct damage to hides and leather.

According to Dr. W. E. Graham, of the National Research Laboratories, Ottawa, who secured this information from Canadian packers and tanners in connection with the leather research programme on which he is engaged, 15 per cent of all hides taken off in 1930 had open grub holes. Damage is most serious during the first six months of the year,

"Through buying hides in the fall to avoid open grub holes, tanners encounter considerable loss through interest charges on capital tied up for long periods, a loss which we cannot estimate.

The existence of grub holes in hides is, in addition to monetary losses involved, a potential source of annoyance and ill feeling due to difficulties in arriving at a proper estimate of an allowance for grubs.

"It is felt that under the present system of marketing in Canada the farmer has not come to realize fully the difference in value between 'grubby' and 'clean' hides. All Canadian hides sell for less because of the warble damage. In the British Hide Markets during 1930 a classification for warbled hides was introduced and as a result warbled hides

The holes in this piece of leather were caused by the Larva of the Warble Fly

39 holes in a piece of leather only 13 1/2 inches long.

when some tanners refuse to buy Canadian hides. In April and May, 1930, the percentage of hides that were 'grubby' ran as high as 45 or 50 per cent. Dr. Graham states that more grubby hides are found on western range stock than on other cattle and that the percentage is 10 per cent greater on steers than on cows. One tanner gave his opinion that 95 per cent of Canadian hides showed the unsightly scars of present or previous infestations.

The warble fly grub, hatched out from eggs laid on the legs of cattle, work their way through the skin, thence to the gutlet and eventually out through the animal's back. They leave holes which gradually close, but always result in a permanent scar which reduces the quality of the leather.

Hundreds of holes caused by grubs have been counted in a single hide. The area affected is limited to about 10 per cent of the hide, or 4 square feet, but is the best part for the production of leather. Samples of leather made from affected hides submitted to the Research Laboratories have the appearance of having been ridged by gun shot.

Losses from the warble fly have reached such proportions and remedial measures have been developed which are so satisfactory that the tanning industry through the National Research Council's Associate Committee on Leather has urged a concerted and determined effort at eradication. The Dominion Department of Agriculture is taking special action. Dr. Graham's estimate of losses incurred is being made available to this department and the other agencies concerned.

That the problem of eradication is by no means insuperable is indicated by the experience of Dean A. M. Shaw at the farm of the University of Saskatchewan at Saskatoon. For some years regular treatment has been applied, with the result that at present it is stated that probably not over a dozen warble fly grubs are found annually in all the cattle. Because the warbles do not fly far they can be controlled locally in comparatively small areas, although it would be considered impossible for a single small farmer to act alone in such a matter.

Farmers are recommended to seek advice as to treatment from recognized authorities.

Dr. Graham's report concludes as follows:

"How strangely they play."  
"Yes. They are exhibition lancers, and they practice while they play tennis."—Der Brummer, Berlin.

W. N. U. 1898

## Praise For Livestock From Saskatchewan

If Quality Maintained Will Command Highest Prices On British Market

Excellent outlook for Saskatchewan's livestock exporting industry is seen in the tribute received by W. W. Waldron, assistant commissioner of the province, from the Co-Operative Wholesale Society of Great Britain.

"If Canada continues to produce and ship to England this quality, we need have no doubts as to satisfactory prices; even on low value markets they would command the highest prices available," the letter received by the commissioner states.

Conjecture is being voiced by Canadian cattle and livestock men as to the cause of the excellent run produced. Whether fortune entered the shipment and found Saskatchewan ready with a "good run" of stock or whether the available cheap feed has caused a liberality in feeding is a matter of conjecture.

A more strict interpretation by Saskatchewan livestock breeders of export cattle is looked upon by Commissioner Waldron as the likely cause for the general good quality stock shipped.

"The last shipment of cattle received per the S.S. Manchester Citizen was about the best ever received from Canada and has done more good in two days than a whole year of post-war advertising or broadcasting could ever do, the quality being far superior to any Irish and equal to any Scotch," the letter relates. "The prices realized on the selected of this shipment were equal to our selected Norfolk cattle." It continued.

"Our markets will be favorable for another six weeks until the Irish grass fed cattle arrive, although even then your selected steers (young finished) will always be in good demand at top market prices," the letter concluded.

## Being Afraid Wastes Time

Hours Spent In Worrying Could Be Used To Better Advantage

J. R. Lumley, editor of the Port William, Ont., Times-Journal, says: "Did you ever stop to think that a lot of good time is wasted over being afraid? Hardly any movement forward has ever been made without someone else spending time in worrying lest it should hurt him.

"We all know how the retail merchant has been scared almost to death of the advent of the chain store. Yet, when it has come, what a lot of merchants have simply plucked up their courage, brightened up their business methods, done a lot more good advertising and found that the chain store that had opened next door had actually helped rather than hurt them.

"The railway is afraid of the bus line, the advertising manager of the newspaper is afraid of radio. If all the time that is spent in nursing fears were devoted to studying the best methods of meeting new conditions and turning them to one's own use by co-operation, if competition won't work, and by liberal use of advertising, most of the nightmares would vanish.

"If I often think of the advice of the trainer, when he felt that his man was nervous about going into the ring, 'remember that the other fellow is just as scared as you are and the man who first quits being scared will score the knock-out.'"

Siam is developing its automobile roads through the jungles.

The United States has about 2,000 railroads.

## Will Visit Churchill

Business Men Under Auspices of Canadian Chamber of Commerce To View Northern Activities

Churchill, Manitoba, once a lone trading post on Hudson Bay and now the scene of developments which will make it a great northern port, will be visited this fall by a large delegation of businessmen under the auspices of the Canadian chamber of commerce.

The chamber is completing plans for the trip which will be made just prior to its convention, which will be held at Regina. On September 7 the party will leave Regina for the north, returning in five days' time after which the delegates, who will represent the 200 Canadian boards of trade and chambers of commerce from the Atlantic to the Pacific, will assemble at Regina for the annual convention.

## Management of Yukon May Be Investigated

Administration Is Now Being Carried On By Chamber of Commerce

Administration of the Yukon territory, now carried on by the Dominion, might be the subject of an investigation, Hon. T. G. Murphy, minister of the interior, said in the House of Commons. He was asked by Rt. Hon. Mackenzie King, Liberal leader, how long the Dominion would carry on the administration and bear the whole cost.

The population of the Yukon was given as 3,500, of whom 2,500 were white people. The House passed a vote of \$185,000 for the administration this year.

## Transport Minerals By Air

First Shipment of Radium Ore From Great Bear Lake By Airplane

The transportation of mineral products by airplane may seem fantastic, but will actually be adopted in Northern Alberta. The fact that the mineral happens to be radium explains its suitability for air transportation. Plans call for an airplane trip to Great Bear Lake during the present month returning with the first shipment of radium ore, of which it is expected that area will become an important producer.

## World's Grain Exhibition

Space For National Exhibits Is Being Taken Up Very Rapidly

Space for national exhibits in the new World's Grain Exhibition and Conference building is being taken up very quickly, a large portion of the mile and one-half frontage for these exhibits having already been applied for. Dr. J. H. Griedale, chair-reports that up to date, over 30 agrarian of the program committee, cultural experts representing many countries will take part in the conference program of the World's Grain Show, 1932.

## A Freakish Earthquake

There appears to have been something almost ludicrous about the earthquake that shook the Old Country. The only casualty was a canary, which suffered a broken wing, but the quakes played havoc among the figures in Madame Tussaud's famous waxworks, tumbling together and smashing the images of criminals, jockeys, tennis players and less notable personages. The re-assembly of these parts will be a delicate piece of work.

The noblest study of mankind may be man, but his favorite study is woman.

# Population Of Great Britain Largest Ever Recorded, But Birth Rate Is Much Lower

## Where Nightingales Are Considered A Nuisance

Inhabitants Of English Village Knap Awaken By Songsters

In all the world there is no song more beautiful than that of the nightingale; but the village of Merrow in Surrey, England, is so much patronized by the songsters this year that the inhabitants are beginning to speak of their "pest of nightingales."

Indeed, visitors have heard more than one person threaten to shoot the birds—if only they could catch them. People living in the vicinity of Merrow Common, many of them land folk whose work calls them early from bed in the morning, are those who complain most bitterly. For as many as five and six nightingales tune up simultaneously between 10 and 11 o'clock each night.

"There were two singing one against the other in an elm tree just outside my window the other night, one man said, 'and the din was so awful that I thought I might get some sleep in the back bedroom. But it was no better there, because another nightingale was singing in the pear tree in my garden.'"—London Morning Post, England.

WORKS BOTH WAYS

Idleness Is Bad For Same As Well As Inane People

Idleness, says the physiologist, is bad for the human. It is bad, too, we think, for the state. Hard work may in some measure reclaim the inane or at least help them to justify their existence. But enforced idleness has a cruel trick of unbalancing minds that brood too deeply on the cares of this world, and before we realize the maimed minds of our race we should see to it that those who are still whole shall be kept whole to the end.

Not on the Program

"Rastus, I understand that you have become the father of twins."

"Yassah; Ah done call the first one Adagio Allegro, and Ah'm goin' to call the second one Encore."

"Musical names, all right. But why do you call the second one Encore?"

"Well, you see, he wasn't on the program at all."

Marble buildings and statues of ancient Greece were not the white objects that are sometimes thought to be, but were painted in bright, soft colours.

A California millionaire recently gave his friends a peacock dinner and the birds alone cost him \$4,000.

"I dream of you day and night, Miss Mimi!"

"Ah, that is why you are always so sleepy."—Lustige Koelner Zeitung, Cologne.

The sun's temperature at its outer radiating surface is 6,000 degrees, absolute Centigrade scale.

Willing To Take Chance

People are getting more air-minded every day, or maybe it's the unemployment situation. Fearing that no one would be on hand to leap from a balloon at the height of 1,500 feet, the Audubon Park Commission, New Orleans, advertised an offer of \$3 for every minute in the air. The advertisement was answered by 121 men.

The sun's temperature at its outer radiating surface is 6,000 degrees, absolute Centigrade scale.

This interesting picture, just received from England, shows the latest campaign designed by the hard-working Empire Marketing Board to boost the products of the Dominions and Colonies in the British Isles. The photograph shows a number of huge packing cases on one of the station platforms in England containing a consignment of British steel for Canada. On the sides and tops of these cases are nailed boldly labels bearing the words "Made in Great Britain for Canada." Under these words are the Union Jack and the Canadian Ensign in color and the words "Canada sent us this order, buy Canadian produce." This message is intended by the Empire Marketing Board to convey to all who may see it, whether at the workshops before the departure, or in the course of the journey to the ports, that Canada is buying goods from the Motherland and that the people in the British Isles should reciprocate. The new scheme is meeting with an encouraging response.

"CANADA SENT US THIS ORDER. BUY CANADIAN PRODUCE"

## WORLD HAPPENINGS BRIEFLY TOLD

Displays of 989 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviatrix who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-days' meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 44th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Knudsen, Eskimo hunter of the Lange Koch Arctic Expedition, who became violently demoralized when he saw his first movie at Thorshavn, Faroe Island.

Among scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Rt. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver-entree dishes. The gift was in recognition of his 61st birthday.

In front of the Australian Commonwealth building at Canberra will be shortly erected a 200 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters in the Mackenzie River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 300 miles from its destination.

## Fruit Land Taken Up

Over 50 acres of orchard and vegetable land were taken up by new settlers in the Southern Okanagan of British Columbia during the past year. Prices ranged from \$80 an acre for raw land to \$750 for improved and bearing orchard. Approximately 25,000 young fruit trees were planted.

## War Hero Dies In Theatre

General Bertrand, national hero for his spirited defence of Liege and for the Yser campaign during the Great War, dropped dead in a theatre at Brussels. He was credited with delaying the Germans for ten days at Liege whilst Marshal Joffre reformed the French army for the defence of Paris.

The youth who claimed that the four kinds of sheep were: white sheep, black sheep, Mary's little lamb, and hydraulic rams, was certainly not a true son of the soil.

"In conclusion, I would plead as an extenuating circumstance the absolute innocence of the accused!"  
—Montaigne—Strix, Stockholm.

W. N. U. 1898

## Canard Week-End Cruises

Something New in the Line of Ocean Travel

A pioneer steamship company for the past 91 years, the Canard Line came to the front this year with something new in the line of ocean travel; the week-end cruise, a voyage which gives practically everyone a chance to afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau, down near the Tropic of Cancer, more than 900 miles south of New York, and the Islands of Bermuda, 600 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in night-seeing, golfing or sea bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit the many historic points in the environs of Halifax, the birthplace of Samuel Cunard, founder of the line which bears his name.

The Canard's week-end cruises are made by the line's express steamers, the "Berenaria," "Aquilana" and "Mauretania," among the largest and finest ships in the world.

These liners steam through the sea at a leisurely pace of 16 to 20 knots, so that the voyager may get the full good of the bracing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be: Everything! People play the regular games and invent new ones of their own; they bet on the day's run of the ship, as well as upon the horserace on deck; they bathe in the indoor pool or in the huge tank on deck; they dry themselves by lying on the hot air heaters or take sun baths in deck chairs; they loaf about in bathing and various kinds of sport suits, the girls displaying many types of wide-legged pajamas; in short, they do very much as they please, and they offend no one by doing so. Also there are lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line goes along to make sure that there is no economy practiced on the bill of fare; that dishes are added rather than cut out.

The entire ship is first class for these week-end cruises. There is no forbidding sign anywhere. Passengers are permitted to use all the public rooms and every deck from stem to stern.

These trips make a strong appeal to vacationists who go away for two or three weeks every summer. They give such people a chance to begin or close the vacation period with a sea trip and yet leave enough time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot after passing through Ambrose Channel. This is an incident which lines the rail with observers. The pilot always leaves in a small rowboat, being picked up a hundred or two hundred yards away by the yacht-like steam tender. Soon after passing here all land fades out of sight. The next delight of this kind is catching the first sight of the land to which the ship is steaming. This always reminds the passengers of the thrill which came to Columbus when the first land loomed up in the West Indies.

Returning from a cruise a great crowd moves to the rail to note the arrival of the Sandy Hook pilot in his little rowboat, looking like a chip alongside the huge liner.

At quarantine, off the eastern shore of Staten Island in New York Bay, the port doctor comes aboard and when he clears the ship the customs and immigration men board the tender from a coast guard cutter and check up on every passenger on the ship, leaving no loop-hole for the stowaway.

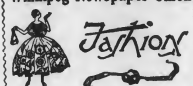

This ceremony over, the ship proceeds to her pier, where many friends await the arrival of the tourists. Once on the pier, the baggage is quickly passed and the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book at once for a week-end tour on the wide Atlantic.

## Fruit Market in China

Fruit shippers of the Okanagan show much interest in the statement of Col. L. M. Coggrave, Canadian Government Trade Commissioner at Shanghai, that China offers a large outlet for low grade fruit at an economical price. The subject was brought up at two meetings in Vancouver addressed by Colonel Coggrave.

Edmonton a City Of Homes  
Eighteen hundred new homes were erected in Edmonton during the last six years, or an average of 300 new dwellings a year. It is pointed out in a special issue of the Edmonton Journal. The original cost of these homes, not including repairs and additions, figures at about \$6,000,000.

## A SMART SLIP THAT ACCENTUATES SLIMNESS

It's the new wrap-around slip that follows the shaping of the figure. It's made from a length of material.

No seams to cause conflicting lines to the outer garment. The wrapped arrangement makes it shadow proof.

The selvage edge of the material makes a smart neat finish for the lower edge of the slip.

The side edges of the slip may be finished with a picket edge or rolled in hem. This is about all the sewing required to make it, save for a few darts through the bodice, and to tack the shoulder straps in place.

It's straight from Paris! You'll be thrilled with the easy manner in which it is made.

It will make an excellent Xmas gift.

The back, too, has perforations for deep V for evening wear. The upper and lower edge may be trimmed with lace.

Crepe de chine, crepe satin and flat crepe are popularly used.

Style No. 900 may be had in sizes 12, 14, 16, 18, 20, yards, 36, 38 and 40 inches bust.

Size 16 requires 1 1/2 yards 39-inch. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## SUNDAY SCHOOL LESSON

JULY 19

## SOCIAL SERVICE IN THE EARLY CHURCH

Golden Text: "He Himself said, 'I am more blessed to give than to receive.'"—Acts 20:35.

Lesson: Acts 4:32-35; 6:1-7; 9:36; 39; 2 Corinthians 9:1-15.

Devotional Reading: Psalm 112:5-10.

## Explanations and Comments

Sharing Possessions, Acts 4:32-35.—There was the greatest unity of feeling and purpose in the early Christian Church; as the proverbial expression has it, they were of one heart and one soul.

Settled on the northwestern shore of the Dead Sea, and living in scattered communities throughout Palestine at this time, were the Essenes, a sect that literally had all things common. Each one deposited whatever he possessed in a general treasury, of which several managers took charge, supplying from it the needs of all. In Egypt there was a Jewish sect called the Therapeutae whose members gave away all their possessions when they joined the order, and there was among them no distinction of rich or poor. It is said of the disciples at Jerusalem at this time that "they were all of one mind and of the same purpose, that none of the things which they possessed was kept back, but they had all things common." With them, however, the giving up of possessions was voluntary (5:4)—each one regarded his property as held in trust for others.

With great power the apostles testified to the resurrection of the Lord, and great grace—God's free favor—was upon them all. The proof of the Divine grace was shown in the wonderful generosity of the Christians in their community; as need for assistance arose among the poor, those who had property or houses sold them, and brought the amount received to the apostles for them to distribute. "Laid the apostles' feet" is a figurative expression which denotes arose from the Oriental custom of laying out at the feet of kings; it meant that the money was left in the apostles' control.

It is interesting to recall here what Aristotle wrote to the Emperor Hadrian about the Christians of those days: "They rescue the orphan from sin who does him violence, and the who has given to him who has not without grudging. And if there is a man among them who is poor or needy and they have not abundance of necessities, they fast two or three days that they may supply the needy with their necessary food."

Sharing Responsibilities, Acts 6:1-7.—The last verse of Chapter V, tells us that the disciples ceased not to teach and to preach Jesus as he had said; now we learn that the result was the multiplying of the number of Christ's followers.

The apostles called a public meeting of the church and put the matter before it. It was not right, they told the assembly, for them to neglect their work of preaching to look after the distribution of food to the needy to "serve tables"—and therefore they counseled that seven be chosen, men of good report, full of the Spirit and of wisdom, who should be appointed for that work. As Chrysostom observes, "It needed great philosophy to hear the complaints of the widows." From the Greek word "diakonia," translated "serve" (serve tables, verse 2), properly or word "deacon"; and it is generally thought that from this choice of the Seven for a special service of the church later sprang. In Phil. 1:1, Paul refers to deacons, and in 1 Tim. 3:8-13, he notes the qualifications necessary for this office.

For the apostles, their time would then be free to continue steadily in prayer and carry on their work of preaching and teaching.

"The secret life of prayer alone prepares and qualifies for the public life of ministry."—J. Stuart Holden.

"Rivers of vitality have their rise in souls that are on their knees before God."—J. H. Jowett.

## New Senators Appointed

Patrick Burns, Of Calgary, Alberta, Named a Member of Upper Chamber

Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate, Arthur Macdonald, K.C., Pontreix, Sask., has also been named a member of the Upper Chamber. Official announcement to this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Leasard, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. J. G. Turfitt last fall.

A party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death, slightly more than two months ago, of Senator G. G. Foster, Montreal. When this vacancy is filled, Conservatives and Liberals will have equal representation.

Unique Gavel Used By President At C.W.N.A. Convention  
One of the most important items in evidence at the Canadian Weekly Newspapers' Association Convention in Regina, Saskatchewan, is the gavel used by President Malcolm Macbeth to keep the editors in order. It is made from the wood of old Fort Malden, vintage about 1800 A.D., and is reminiscent of General Isaac Brock and Tecumseh, the famous Indian chief.

## Keeps Editors In Order

Unique Gavel Used By President At C.W.N.A. Convention

One of the most important items in evidence at the Canadian Weekly Newspapers' Association Convention in Regina, Saskatchewan, is the gavel used by President Malcolm Macbeth to keep the editors in order. It is made from the wood of old Fort Malden, vintage about 1800 A.D., and is reminiscent of General Isaac Brock and Tecumseh, the famous Indian chief.

This gavel was presented to the association in 1930 by the Lake Erie and St. Clair Pulpitmen's Association. At that time Hugh Savage, of Duncan, B.C., was president of the association, so the gavel was handed to him with the words, "From one savage to another."

The gavel is suitably decorated with a silver plate setting forth its antiquity and usages.

## Introduced Amendment To Companies' Act

Bill Aims To Aid Employees In Purchasing Homes

Amending the Companies Act so as to enable a company to make loans to its employees for the purpose of purchasing or building their own homes, even when such employees are shareholders of the company, Hon. C. H. Cahan, secretary of state, introduced a bill into the House of Commons. The bill received first reading.

The amending bill also permits the auditor of a company to be a director, when such company's bonds and shares are not offered for public subscription.

Aluminum is extensively used in making very small automobiles in order to lessen weight.

## Another Notable Flight

Captain Hawks Makes Remarkable Time In Eastern Canada Hop

Quebec, Montreal, Toronto and Ottawa have been drawn closer together by a series of sensational flying performances of Captain Frank M. Hawk, famous United States speed pilot.

Montreal is no more than 32 minutes from Ottawa; 48 minutes from Quebec, and 108 minutes from Toronto, while the capital and Toronto are only 70 minutes apart. These were the times taken by Hawk and his monoplane in a flight from Quebec to Montreal, then on to Toronto, and back to Montreal via Ottawa. Several of these times were hailed as new records of the air.

Hawk flew from Quebec to Montreal where he enjoyed breakfast, Ottawa as guest of Hon. Hanford took luncheon in Toronto, tea in and was back in Montreal to be MacVicker, United States minister, guest of the Montreal Light Aeroplane Club at dinner.

Altogether Captain Hawk was in the air four hours, 18 minutes and during that time covered an air distance of approximately 850 miles, averaging 197.6 miles per hour. The achievement rivals in some measure the notable recent flight of Captain Hawk from Paris to London, on to Berlin and back to Paris in a single day; also the flight that took him from London to Rome and back in a single day.

## Research Grants

Westerners Receive Aid Under Banting Research Foundation

Among the scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

Prof. F. D. White, P. G. Mar, and Dr. R. H. Fraser, all of University of Manitoba, were awarded short-term grants.

Professor White is the assistant professor of bio-chemistry at the Medical College, Peter Mar has completed his second year in medicine, and Dr. Fraser is the lecturer in physiology and pharmacology. The research work which is being done by them covers the present summer only, and was begun shortly after the closing of the winter term at the medical college. Peter Mar is a graduate in science of the university, and has this qualification for research work.

## Onion Diet For Sheep

Sheep flocks on Colorado's western slope have been put on an onion diet to reduce last year's surplus. F. D. Warren, warehouse owner, said hundreds of sacks of onions have been given sheep owners, as there has been no market for them.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

## Make Your Windows Pay

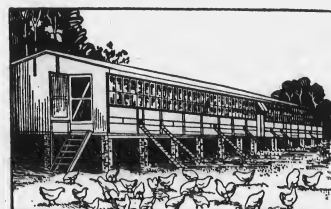

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

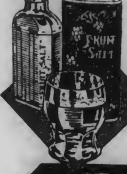

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: CHANTLER & CHANTLER LIMITED  
51 Wellington St. W. - - - - - TORONTO, ONT.

## Harsh, Gripping Purgatives Are Dangerous!

Cheap, harsh laxatives may prove very costly. Painful rectal troubles are often aggravated by the unnatural gripping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

**ENO'S  
"FRUIT SALT"**

## THE DUSTY HIGHWAY

Copyright 1929

CHAPTER XXII.—Continued.

Her eager groping for courage tore the old man's heart; but he answered with well-simulated cheer: "O course I do! Like as not they're safe and sound on some nice, cool island, with plenty of coconuts to eat, and so much good fish that Nick'll hate to see Friday come round after he gets back. I ain't a-goin' to let myself think they ain't safe, dearie, and you mustn't neither. Only 'in the spite of an heroic effort his voice trembled, and 'here the waitin's powerful hard."

It was evening. The little boys, were in bed, and Gay and Simeon were on the side porch, looking across the garden to the white pillars of Hal- liday's fine old house. Lights were on in the room that had been Angela's, and they could see him moving about, doubtless doing the inevitable late in the morning. When the room was dark again, Simeon stirred, and arose, and said: "Julie's out," he said. "Halliday told her to go 'cause she'll have to stick so close while he's away. He wants to see you, Gay, to say good- bye. He asked if I'd come over and set a while, so's not to leave little Martha all alone. You'll see him, won't you, dearie? He said if 'twould bother you he wouldn't come."

Gay hesitated. Since the news of the probable disaster she had seen to the Maxwell's, and, much as she liked James Halliday, she shrank from talking with him. How could she offer sympathy to one whose wife had been, she felt sure, only a mil- lionaire about his neck? What could she say? His was not a sorrow like her own—yet.

Suddenly Gay drew a long breath. Halliday had stepped out onto the porch and dropped into a chair, his face buried in his hands. Something in his desolate figure brought under- standing. She saw things in a new, light—a truer proportion. After all, his was the greater sorrow—not hers. She had her memories—he had only regrets. What James Maxwell's mature mind had grasped at once, Gay had to learn by groping, and through suffering. Of course she would see James Halliday!

She looked up at Uncle Sim's un- gainly figure, still hovering uncertainly at her side.

"If—if you don't feel just equal to it, dearie—" he hesitated; but Gay said:

"I do, Uncle Sim. I want Mr. Halli- day to come. Tell him to come now."

"Well," said Simeon relievedly, "maybe I'll do him good to talk. He don't look well."

"You're very good to see me," said Halliday. He had drawn a chair close beside Gay's hammock, and had taken her hand. "I'll try not to tire you, but, really, there's a good deal to say. Do you mind if I do most of the talk- ing?"

She smiled, and felt suddenly an

It was a strange company that as- sembled in the cabin. Each wore his life preserver, which, Nick thought grimly, would only prolong the agony a little, for if the boat went down there would be no possible hope for any of them. Amy Meyer held little Marjorie in her arms, trying to calm the frightened child whose cries at last subsided into an occasional whim- per that made Angela cringe with terror.

"Can't you stop her?" she kept saying petulantly, unmindful of the fact that no one seemed to hear her. "Can't you stop her?" Yet when the child was silent her silence seemed more terrible to Nick than did her cries.

They sat huddled together, as if there were at least some comfort in close contact with humankind. To talk was impossible, even had anyone the desire to speak. When they did speak it was to shout. There was no chance for confidence, no opportunity to say, as some of them longed to say: "If you get back will you take this message?"

Nick envied the crew. They, at least, were fighting the elements. Their hands were occupied. His own felt strangely useless. Once he took Marjorie from Amy's weary arms, and despite her fear, the exhausted child slept there for a while, waking again to call frantically for her moth- er. It was a time of inaction and suspense that was to be forever a terrible memory to them all. Nick found himself wishing that the end would come. It seemed inevitable—a plunge into those dark waters was but the refinement of cruelty.

Dawn seemed not dawn—merely a lifting of shadows. The hours dragged. At times when the waters grew calmer for a moment, hope would arise, only to be dashed as the storm continued with fresh violence.

A second night set in. It seemed incredible that the boat still lived; that it had not been battered to pieces by such violence. Yet as the night advanced it seemed to Nick that the storm was undoubtedly subsiding. He was sure that the force of the wind was growing less. Hope rose, only to be quenched by a sudden racing of the engines. For a moment they all thought that the end had come. Mar- jorie, who had been fitfully asleep, cried out in terror, and springing up, her father went below. When he re- turned his white face would have told them of some fresh calamity, had his lips been more than white.

"It's the propeller shaft—broken—"

(To Be Continued.)

## THE RHYMING OPTIMIST

By Aline Michaels

FAITH'S FLOWER

Of faith I sing, of faith that leads Us always on to better deeds;  
Of faith that like a beacon glows And makes his life as lovely as a rose;  
Of faith that to our souls is given So we may gain an earthly heaven.

Through all Earth's dark and doubtful maze By star-strewn roads or forest paths  
Like a mother's guiding hand Faith leads; why seek to understand

The reason of the things that are? In darkest night faith finds a star!

Faith brings a joy no man can gain In reason's cold, severe domain;  
And wise are we who tend faith's flower That, in some storm-rent, cruel hour

Grows up into a towering tree With sheltering boughs for you, for me.

No child should be allowed to suffer from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

Manitoba Child

Famous for wheat, butter and honey, Manitoba is also becoming a good producer of considerable im- portance, the present output being estimated at the rate of 150,000,000 annually. This is a substantial in- crease over production in previous years. Manitoba's gold output by months for the present year is as follows: January, 10,638; February, 9,238; March, 7,785; April, 8,267.

Gross Agricultural Revenue

The gross agricultural revenue of Canada in 1930 is estimated at \$1,240,470,000, of which Ontario accounted for \$421,242,000; Quebec \$268,280,000; Saskatchewan \$175,546,000; Alberta \$156,731,000; Manitoba \$89,677,000; British Columbia \$49,500,000; Nova Scotia \$37,823,000; New Brunswick \$34,214,000, and Prince Edward Island \$19,701,000.

## Vagaries in Time Methods

Speed of Modern Life Makes Second Hand More Important

Clocks and watches are changing their faces to keep up with a civilization that is rushing toward disaster speeds. The United States, land of the split second, buys more and more clocks on which the second hand has grown from a silver to a pointer as light as the minute hand. Gaps that used to punctuate the evening radio have disappeared because entertainment has become so scheduled on the second, says a National Geographic Society bulletin.

Trains listed to leave on the minute actually leave on the second. The world-wide reputation of an athlete may hang on a fraction of a second, a segment of time so small that a special timepiece, the stop watch, had to be invented to record it. But with no European refinement of time and clocks, America does not conform.

Trains on the continent can leave at 0:00 because the continental rail- road schedule for most countries is based on twenty-four hours a day instead of twelve hours A.M. and P.M. By international agreement a train that arrives at midnight, arrives at 24:00; by agreement a train that leaves at mid- night, leaves at 0:00. Some clocks in railroad stations show numerals one to twenty-four; others have num- als thirteen to twenty-four within the ring one to twelve. England has not gone over to continental railroad time.

Hours as recorded by modern time- pieces are a relatively recent inven- tion. Martin Luther would find our clocks decidedly queer. Napoleon's in- stinct for order would be gratified to know that the hour had at last been standardized in all parts of the world.

In Paris, until 1819, the hour was a variable unit of time lengthening in summer time, shortening during the winter days. It was the Paris equivalent of our daylight saving system; but when Napoleon's army arrived in Nurnberg and parts of Central Europe another system was used down to 1809. At the time of the equinoxes day and night were divided into twelve hours equally; day time beginning dawn, not midnight; night, beginning at sundown, not noon. But as winter came on and the days grew shorter the hours al- lotted to day were cut off so that in December, night hours were num- bered one to sixteen; day, one to eight. The reverse was true in summer. A season of the year was often referred to as the time when the day has thirteen hours.

Greenwich's master clock for the world has a dial with numbers from 1 to 24. It is located exactly on longitude 0 degree, 0 minutes, and 0 seconds. Here the maps of the world begin because all longitude is numbered east and west from Green- wich, and all time bands are fixed with reference to the English ob- servatory outside London. Eastern, Central, Mountain and Pacific times in the United States are adjusted with reference to the Greenwich master clock.

## Ram Club Policy

Government Has Plan To Develop Uniform Breeding On A Community Basis

Supplying of purebred rams at six per cent and payment of freight to destination are outstanding fea- tures in the ram club policy of the Dominion Department of Agriculture. Under its policy, Hon. Robert Weyer, Minister of the Department, pointed out, graded rams will be supplied as ordered by club members, and the department will assume payment of any additional cost over the stated price. Freight charges to the nearest rail- way station to the club will be paid.

October 1 is the final date up to which orders for graded rams may be placed with the department in any year. The object of the policy is to develop uniform breeding on a community basis.

London may limit the number of charity street collections, there being more than 300 in the last year.

## Rheumatism?

Quick relief from rheumatic pains without harm:

To relieve the worst rheumatic pain is a very simple matter. Aspirin will do it every time. It's something that you can always take. Genuine Aspirin tablets are harmless. Look for the Bayer Cross on each tablet.

## The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAN BEFORE. After many ad- ventures firing over China, Captain Jimmy and his friend Jed Scottie went to recover the "lost" which Canada was forced to land in enemy territory. One night, raid on the camp to secure food and gasoline.

Under the cover of darkness I made my way quietly toward the big tent. If our plan succeeded we would soon have enough raw and oil for our plane—if it failed we would need any.

While I softly crept along, taking ad- vantage of every shadow, Jed Scottie was busy stirring at what he figured was the proper place to carry out his part of the plan. He dis- mounted, he saw the bridge rising, he heard the head and proba- bly would have been crawling close to where a soldier stood.

At the end of his post he turned and saw Jed Scottie had dashed at the scarcely breathing. He sensed the ex- citation of his friend, and he knew that Lieutenant Stone held tightly.

The sentry was just in front of them when Jed Scottie and his friend "Go get him," he whispered, and Scottie was off like a rifle bullet. At the first

Montreal and Winnipeg Brought into Direct Voice Connection

A new link in the proposed trans-Canada telephone system was forged recently when Montreal and Winnipeg were brought into direct voice con- nection by the circuit wires of the Bell Telephone Company of Canada and the Manitoba Government Telephone system.

Inauguration of the direct circuit was without ceremony, but marked a step forward in the development of the telephone system in Canada, and all telephone calls from one point to any other in Canada entirely within the boundaries of the Dominion.

At the same time the third com- mercial Toronto-Winnipeg circuit was inaugurated. Until the first instal- lations, this circuit was direct, ob- viating switching at North Bay.

The total pole line mileage of the trans-Canada system will be 4,263 miles, by provinces as follows: Nova Scotia, 142 miles; New Brunswick, 385; Quebec and Ontario, 1,852; Man- itoba, 242; Saskatchewan, 465; Alber- ta, 418; British Columbia, 659.

Persian Balm preserves and en- hances woman's natural heritage of beauty. For sheer feminine loveliness it is unrivalled. Tones and rejuvenates the skin, and makes it exquisite in texture. Delightful to use. Smooth and velvety, it imparts a youthful charm to every complexion. Indis- pensable to all women. Especially recommended to make hands soft and white. Delicately fragrant. Preserves and enhances the loveliest complexion.

Flags Of Many Nations

Colorful Display In London Church Is Symbol Of Many Religions

At a recent morning service in the Ethical Church in London, England, the Yugoslavian flag was presented to the church, which is in Queen's Road, Baywater, Dr. Stanley Cook, president of the Ethical Church said: "For the first time the congregation of an English church see ranged around them the flags of many nations. They symbolize the ideal of the modern world, the ideal of the brotherhood of nations." Dr. Stanley Cook, first secretary of the Yugoslavian legation in London, was present at the ceremony. The various colors of the flags of Great Britain, the United States, Italy, France, Belgium and other countries were also present in the building, and matched in their diver- sity the symbols of many religions which this broad-minded church shelters within its walls.

Earns Fabulous Salary

In a suit against Robert Ripley, cartoonist, brought by Famous Speak- ers Inc., New York, who alleged breach of contract, it was revealed that he earns weekly \$5,000 for his cartoons, \$2,500 for films, \$1,000 for broadcasting, and \$3,000 for vaude- ville.

Mrs. Deddbee—"Call tomorrow, please."

Bill Collector—"That's what you said yesterday."

Mrs. Deddbee—"Well make it day after tomorrow, then."

Nearly 5,000 persons are required in the central office alone to handle Japan's postal-savings business.

JEAN—"So you married your em- ployer. How long did you work for him?"

JANE—"Until I got him."

AN amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes, it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 25c.

## Anglican Picnic

The congregational picnic of St. Luke's and St. Alban's churches yesterday afternoon at Lee Lake proved very enjoyable. Races for children and adults, plenty of ice cream cones for the children and glorious weather made a splendid afternoon. Some took a dip in the warm water of the lake, whilst others who are past the nimble and athletic age enjoyed the peaceful scenery of that beautiful spot nestling among the trees.

The tug-o-war between ladies and gents teams of Blairmore and Coleman provoked keen rivalry. The ladies of Coleman won their tug, and the gents of Blairmore had the edge on Coleman men, as Teddy Royle's 250 pounds of overdupis was too great a handicap to overcome by Coleman.

Cars were loaned by Dr. Borden, L. Lindoe, Frank Graham, Rev. A. S. Partington, J. Rushon, C. J. Devine, Geo. Morgan, Sidney Short, Wm. Bell, and several Blairmore people loaned cars, to convey their contingent, for which thanks is expressed, also Sam Moores.

The party reached home about 9 p. m., well pleased with the afternoon's outing.

## Personal and Local

Rev. Fr. Lehman left on Monday to attend a retreat in Calgary.

Mrs. J. L. Lonsbury returned from a visit with friends at Fernie.

Arthur Kirkby of McGillivray offices is on his annual vacation at his home in Calgary.

H. Wilton Clark, motored from Chicago to visit his parents, Mr. and Mrs. Harry W. Clark.

Mrs. J. J. Weaver and family of Blairmore are holidaying at Lee Lake.

Mrs. Hugh Dunlop, Gwennie and Audrey, are visiting friends at Lundbreck.

Mrs. A. S. McLintock and children left last week on a two month vacation to Winnipeg.

The home cooking sale by Holy Ghost ladies aid netted \$17.45. The convenors were Mrs. Guerdard and Mrs. Cyr.

The "Victor" Superette Radio at \$89.50 on sale at G. R. Powell's is the best value yet offered. A demonstration will be gladly given.

Mr. and Mrs. George Kellock and Agnes and Jim are spending a holiday at Vancouver. Mr. Kellock will return after a few days.

The easiest way to buy or sell miscellaneous articles of furniture is by advertising in The Journal at 2c a word.

The Rawhide Trail is the name given by Brewster Transportation Co. to the trip from Waterton to Emerald Lake, via Crows Nest Pass.

Miss Beatrice Marsh of Vancouver is spending three weeks holidays with Mr. and Mrs. Reid of Carbondale.

Mrs. G. R. Powell has been spending the past three weeks with her son, Ross, and Mrs. Powell, at their home in Calgary.

Last week a party of young people of the United church walked from Crows Nest to Corbin and return, and this week a party of six climbed Sentry mountain.

A party of ladies visited Lethbridge this week, including Mrs. Dewar, Mrs. G. Pattinson, Mrs. E. Brown of Fernie and Miss Evelyn Stout.

Hugh Davidson, of Vancouver, president of the International Coal & Coke Co., Ltd., was a visitor during the week on company business.

George Bancroft in "Scandal Sheet" will be the week-end feature at Palace theatre, and in addition Universal News Reel. A good program—see it!

Antrobus' Shoe Store announces that samples in Woods Lavender Line have arrived, and these are the most gorgeous ever shown in Coleman, and the prices are right.

Create business by creative effort. There is buying and selling going on all the time, and the merchant with the creative mind will continue to do business. It is similar to fishing. Sitting on the bank will not bring fish, neither will sitting in a store waiting for customers bring business.

### IMPORTANT NOTICE TO ADVERTISERS

Next week's issue will be published on Wednesday, July 22, a day in advance of pay-day. Kindly have change of advertisements in by Tuesday afternoon, in order to get paper out in advance of pay day.

Robert Gray is back on his territory looking up business for Plunkett & Savage. He was as usual very active in promoting the Elks carnival at Blairmore, and stated that it will show a surplus, despite the conditions.

This is the time when proud owners of flower and vegetable gardens begin to compare their products to find who has the largest potatoes, carrots, or other vegetables. The Journal will publish the particulars of samples brought in.

Two scenic artists from Calgary have been in the Pass towns painting the clouds with sunshine. Beer parlors particularly have received their attention, and thirsty souls may now gaze on pictures depicting the snow capped Rockies or the burning sands of Africa. If they look upwards they may see pictures which fire their imagination to flights untold. The artists are fast workers, and the color combinations are glorious to behold.

Burton Hall, a former Coleman resident, passed through on Monday from Calgary, en route to Phoenix, Arizona, where he is now living. He took with him from Calgary his sons Ken and Maynard, who have been living there with their mother since leaving Coleman. Mr. Hall has been living in Arizona for some time. He spent a short time here meeting a number of old acquaintances before continuing his journey.

96,000 trout fry from Waterton Park hatchery were distributed in Crows Nest lake and various streams throughout the district. A. Phillips, president of the Rod and Gun Club, and E. W. Beart, secretary, with Joe Plante, assisted Mr. Cable, of the hatchery, in distributing the fry. Mr. Beart states that the restocking of the streams in recent years has shown very good results.

The Journal office can fill your orders for commercial stationery.
